Dear Mayor Daley,

I think that we should have 3 big farms in Chicago. We should have three farms because we will get fresh food when we go to the store. We should have cows, chickens, sheep, and many other animals.

This idea is great because we don't have to give money to the other people. And we don't have to wait for the food to come here from the other country. It will be picked fresh from the farm.

For my plan we will need good farmers, good diggers and people who really good at planting, and they have to know how to run a farm. They have to know how to be careful with raising animals.

This will change Chicago by making the air fresher we will have trees and flowers on the farm. The flowers will make Chicago look nice and pretty.

Mayor Daley, this plan is great for people who want to be farmers and we will have fresh food to eat when we go to the store. This plan will be very good for the citizen of Chicago.
