

May 12, 2009

Dear Mayor Daley,
My new plan for Chicago is to assign volunteers from the community to teach classes for everyone in Chicago on how to plant flowers and trees. Also, we can have classes teaching citizens to pick up garbage off the streets. The city will need different types of flower seeds to plant. We will also need shovels to dig, and gardening tools. My plan will help the environment because we will see more trees and flowers outside. When we plant more trees the oxygen will be cleaner so we can breathe better. My plan will change Chicago because people will be able to work together to make our environment better. There will be no more garbage outside because everyday people will clean up the city. The city of Chicago and the communities can plant trees and pick up garbage, not just on earth day, but everyday. Chicago could be the cleanest city in Illinois if we all work together to make Chicago a better place for everyone to live in. I hope you consider my plan for Chicago.

Sincerely,
