

### 5-8-9 Seward Branch Room

To make Chicago clean and safe we need to make the park safe. No more guns.

Make little carriers for the gangs members could not see it, clean the streets to make a circle that will get you to work. And if one boy gets sick they could make a pill that when you pass it, it will make you better. That the doctor will make a outfit invisible.

When somebody gets drunk in the car the car will drive. And a doctor will make a robot that will stay awake and when somebody calls a store and the robot will go where the gangs go. They will make something that will make Chicago clean.
