

5-12-09

Dear Mayor Dalcy

I have a few ideas for you on how to make our city of Chicago a better place to live. My first idea is to recycle. My other idea is fixing the streets. My last idea is to change schools. First of all, recycling is important because we can use the same paper and cups. Some times old clothes we would not kill to many trees. Let me explain why we need to fix the streets. First we need to cover the holes in the streets. Some peopl have lost the wheel of their cars. Some people have also gotten hurt because of the holes. I think you should make some the holes get covered up. last but not least. We should have music class. Eevery student should have their own laptop so we can look up sturr on the internet. I hope that you change some things in our city

Sincerely,

Seward Academy
