Dear Mayor Daley,

I think that you should make a program where the poor people can get medicine for a cheap price. So they can cure their illnesses.

One reason that the program should be put up is people can buy medicine if they have the cold/flu. They won't pay too much.

If people are really sick they can get the right medicine for a low amount of money.

This way they won't pay like forty dollars.

People can buy the medicine that their families need to get better.

Some poor people can't buy pills that they need because it's too expensive.

This will help poor people because they will be cheap.

If you put up this program it will help poor people because they can get their medicine for a very low amount of money.

These are all the reasons that I think that you should put up the program.

My family cannot pay for medicine that is too high.

Sincerely,
3rd Grade Seward
