Dear Mr. Mayor,

My name is

I go to Solomon
Elementary School.

I am in the third grade.

I think we should lower
the price of electric cars.

Because we always waste
our oil. People also don't

care. I think this because,

1. We need oil for cars and we don't ever waste our oil wisely.

2. Sometimes oil can kill and hurt nature everywhere.

Countries ship oil all the time. Sometimes an oil spill will happen. But after the oil spill, people still have and want to ship oil.

I believe this should

stop right now in its place.

If we do this it will help change Chicago.

Then Chicago will be known as the city that is beautiful, clean and does not pollute.

Think about it Mr. Mayor, this might just take a week.

Write me back!

Sincerely,
