Dear Mr. Mayor,

I think there should be jobs for anybody that wants one. I think it's a great idea because people can buy houses, food, water and they don't have to live on the street. This will be a good change for the city because I won't see people on every corner begging for money. It will take a lot of money because builders will have to build colleges so people can take classes and then they can get a job. It might take a while but if I'm lucky it just might work.

Sincerely,

9 yrs.
