Dear Mayor Daley,

I have a big plan for Chicago. I would like you to improve schools. Make them with science labs and advanced computer labs. Some schools need healthier food choices and better chefs. This is a good idea because kids will live longer because of healthy foods. They will also get better education. When kids grow up most of them will have a good job. They will and be able to help companies if you improve schools.

The city will need to do a lot of building. They will also need to hire good and well educated teachers. Also a lot of teachers. The city should also be clean. Including streets and schools. The food should be better and healthier at schools and restaurants.

Sincerely,
