Dear Mr. Mayor,

My big idea for the city is Geology schools in every neighborhood. When people want to be a geologist they don't want to travel to a place. Instead of driving you can just walk to the school. Geology is important and more people would want to be a geologist maybe. There would be a lot of schools and a bigger city, and more geologists.

They would need to raise a lot of money or lower the taxes to 300 dollar each bill/tax. They would need to find a lot of rocks to teach about. They would need to get teachers. Oh! And it will take 3 or 2 maybe 5 or 9 years to make all the schools.

Best Wishes,
