Dear Mayor Daley

Here are some good ideas
how to make Chicago a better
place. My idea is to have free
internet for everyone in Chicago.

Having internet can help people
with important information. People
will be smarter. This could help
people that are in danger in the
city. They can E-mail someone
for help. I think it will help with
security. Also it could help new
people find important places in
Chicago faster.

This is how you can make Chicago
a better place to live.

Yours truly,
