

Communicating Science thinking through Poetry

R.CCR.7 – Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively as well as in words.

Rating	Description
Expert	Description includes responses using 7 th Grade Essential ISAT Content vocabulary. Students select a science vocabulary category and use all the vocabulary in that category to write a poem. Responses are complete and thoughtful. Responses are neat, free of spelling and grammar errors.
Practitioner	Description includes responses using 7 th Grade Essential ISAT Content vocabulary. Students select a science vocabulary category and use all the vocabulary in that category to write a poem. Responses are complete and thoughtful. Responses are neat, some spelling and grammar errors.
Novice	Description includes responses using 7 th Grade Essential ISAT Content vocabulary. Students select a science vocabulary category and use all the vocabulary in that category to write a poem. Responses are partially complete and thoughtful. Responses are neat, some spelling and grammar errors.

Inquiring about astronomy

Expert

counting down to launch
right into the ~~9th~~ traveling
so fast we'll go past the ~~hemisphere~~
into the ~~9th~~ passing 911
~~9th~~ it's so fun it's like were at
a mini Bar

Through the ~~9th~~
man what a vacation, Away from
earth's ~~9th~~ From our happy
american nation, No ~~9th~~ Just ~~9th~~
boy I hope they make up the
calvary,

Into Jupiter's ~~9th~~ wow the ~~9th~~
~~9th~~ of that planet was really
exorbent, right seeing on the ~~9th~~
of saturn's rings seeing there beauty
made me start tingaling

on to the ~~9th~~ neptune and Pluto
those two make a really good duo,
Now it's back to our home planet earth
were we rain on our turf

I am a constellation the star of
the solar system the planets
orbit in gravity around me. The
rotation makes me
glide in the
atmosphere. The mass
has no weight
and neither does
the air mass as
I rotate around
the hemisphere. I am
a constellation apart of
our solar system.

Stars so bright,
 in the night sky,
 the rotation of the hemisphere,
 moves with all its might.

With no gravity
 the equinox is lifted
 the orbit that we have from the Sun
 is lifted.

all planets in the solar system,
 with their atmospheres, mass and
 air mass.

They think they're so cool with
 their unique way to laugh.

constellation, constellation
 where do you fit in.

Of course you fit in with
 call "ageneration".

Constellation of
STARS are so
sky high. But
I am willing
to fly.

Expert

atmosphere, hemisphere
are not the same.
one has GRAVITY and
Doesn't have ANY shame.

MASS of PLANETS AND
SOLAR SYSTEM Rotation.
When they all are together,
they have a big Relation.

Weight, AIR MASS AND ORBITS
Doesn't count although there is
no weight they all have the
same amount.

Science Poem

Practitioner

To do an experiment
you need an experiment
so get some research
and do the experiment

State the strategies
State the conclusion
State the measuring materials -
your using

Use your visual observation
to get your estimation
than do your investigation
to get your averageation?

Lowizzo

Science

Most kids don't know much about

Science and experiments.

I've come to the

conclusion that

the average 7th

Grader doesn't

want much to do

with science.

But it's not hard

to listen. It's

not hard to

make a

visual observation.

It's not hard to

do research. It's

even easier to

investigate. In

a few years, the

test rate for

science can

really go up.

I wonder

I wonder about the atmosphere

I wonder about the weight mass and gravity of all the planets

I wonder if there is a hidden planet in the solar system and what is the air mass of that hidden planet.

I wonder how many stars are in the stars constellation

how long it take for the sun to orbit around the planet

I wonder this what I wonder about

The estimate of science
technology is how to
route and investigate
the recycle of the strategy
and visual observation,
you have to get your
education to do the science
presentation, conclusion,
experiment, research, have
everything to do with
scientific method, but
the secret is how to
measure it!!!!

I am an Astronaut
in my constellation.
My hemisphere is warm
The orbits and plants
rotation is so slow
I am surrounded
by stars beaming
My weight is 2 pounds
There is no gravity
I float ground and
around. I am outer
space.
