

A Better Future

Target: Analyze a situation and make a plan.

There are many things we can do now to make the future better.

Choose one of these kinds of improvements:

more jobs

better schools

better transportation

more educational television

a cleaner environment

better housing

more health care

less crime

(another kind of improvement)

Make a plan for that improvement.

List the steps that people need to take to make this progress.

Then send your plan to one of the candidates who wants to be President.
