Developing High School Capacity

Each month, if the school emphasizes one important general area to develop, everyone can work together on more effective instructional program.

Month	Emphasis of the Month
September	Strategic readers
October	Assessing with Graphic organizers
November	Writing across the curriculum in a variety of formats
December	Assessing understanding through levels of questions
January	Students Create Multiple Choice Questions
February	Involving students in learning debates
March	Students write Summaries and Digests
April	Poetry across the Curriculum
May	Students provide comprehensive assessment through student constructed "CASE" for every subject.
June	Learning Yearbook

This chart is adaptable.

The point is to choose a general focus that will benefit everyone, to work on that area school-wide.
