NONFICTION: Working at the Television Station

Center for Urban Education ©2007

There are many jobs at the television station. Some of them are people you see. If you watch the news, you see people reading the news. But there are many people working there. You do not see them all.

There is a producer. That job is important. That person makes sure the news is ready. The producer tells a reporter where to go and who to talk to about the story.

The reporter will interview someone. The reporter will make a list of questions. Sometimes the reporter will take a taxi to a place. Sometimes they will go in a car.

There is a news director. The director learns what is happening in the city. The director chooses what stories to put on the news. If it is important, the director will put it into the news. Then the producer will send a reporter to get the story.

There are workers who use cameras. They make sure that the picture is clear. They make sure that you can see what is happening.

There are news writers. They write about the news. They tell what is happening.

There is an editor. The editor reads the stories. The editor changes the stories. The editor makes them clearer. The editor makes them interesting.

There are two people who read the news on the show. They tell what is happening. They are called anchors. They may talk about the news, too.

There is a weather reporter on the news. That reporter tells the forecast. The weather is always changing. The reporter needs to explain the weather. So this reporter needs to know a lot about weather. The reporter uses maps to tell what is going to happen.

The news program tells you what is happening. It tells what will happen, too. It tells you the weather forecast.

Questions developed by Center for Urban Education for use by Chicago Public Schools, 2009.

Directions: Choose the best answer for each question

1. What skill does a news anchor need?

- a. how to drive
- b. how to use a computer
- c. how to read
- d. how to use a camera

2. What skill does a news editor need?

- a. how to cook
- b. how to plan
- c. how to make a book
- d. how to write

3. What skill does a reporter need?

- a. how to drive
- b. how to plan
- c. how to write a book
- d. how to use math

4. What skill does a weather reporter need?

- a. how to write
- b. how to read
- c. how to plan
- d. how to drive

5. *Write your own answer to this question.*

What does a director do when something happens in the city?

TEACHER NOTES: Develop Students' Skills: Exercise Thinking

These questions have not been validated, so decisions about student's achievement should not be made based on their responses. They are intended to exercise skills. Recommended activities include: students work in pairs to choose the best response; give students the questions without the responses so they generate their own answers; students make up additional questions; students make up questions like these for another passage.

Answers: *You can remove this answer key and then give it to students and ask them to figure out the basis for the correct response.*

Item	1	2	3	4
Answer	c	d	b	b

Question 5 is open-ended. Here is a suggested response.

5. Decides if it will be on the news.

Skill: Infer Predictions**4th Grade Assessment****FICTION:** We're on the News Center for Urban Education ©2007

My school was on the news last week. We had made a big change in our community. We had planted a big garden where there had been a vacant lot.

I learned a lot about television news. First, our principal called the TV station. She told them what we were doing. She talked with a producer. That is a person who sends reporters to do stories.

The producer checked with the director. They said there were lots of stories like this. So they wanted to know what was special about our garden.

The principal explained that we had made a prairie garden. She told how we had gone on the Internet to learn about the prairie. Then we had gone to a prairie and gotten seeds. We got the seeds from the plants. Then we planted them. We did not water the garden. We did weed it. But we let nature water it with rain. That was how prairies grew in the past. We sent a picture of the garden. In the picture the grass was so high it was taller than the fourth grade students.

The director thought this was interesting. It was not just a garden. It was a history lesson. It was a science lesson, too. So they sent a reporter. A camera man came, too.

They interviewed the principal. They asked questions about the garden. Then they interviewed us. We told what we had learned. They interviewed a person on the street, too. They asked what he thought about the garden.

They were at our school for two hours. We were excited. Then that night we watched the news. There we were. They told our story. It was only two minutes long. But it was us. We were famous.

Directions: Choose the best answer for each question

6. What would have happened if the principal did **not** call the TV station?
- a. They would have been in the newspaper.
 - b. They would not have been on the news.
 - c. The neighborhood would have been special.
 - d. The children would have been famous.

8. What do you think the students did after the TV news show?
- a. They watered the garden.
 - b. They felt special.
 - c. They studied the rainforest.
 - d. They learned about weather.

7. What would have happened if the director did **not** think the story was important?
- a. They would have been disappointed.
 - b. They would have learned about interviews.
 - c. They would have been on television.
 - d. Their families would see them on TV.

9. What do you think the editor did when the editor saw the reporter's story?
- a. Took the important parts to put on TV.
 - b. Enjoyed it.
 - c. Learned about gardening.
 - d. Called the principal.

10. *Write your own answer to this question.*

What do you think the students' families said when they saw the news about the garden?
