

What's Ahead: Bird Futures

Birds have been around longer than people. Some kinds of birds aren't living any more. Many other kinds of birds have changed as their habitats changed.

What will birds of the future be like? Imagine Chicago 100 years from today. Probably we will have more buildings, more streets, and fewer trees.

Invent a bird that would fit into the Chicago in the year 2100 – 100 years from today. Draw and describe it on this paper.
