

DIAGRAM TO ANALYZE

The following activity can be done with a text, figuring out a situation that involves two different characters or a textbook profiling two different locations or situations, or with a plant, or with two objects.

For example, you can compare and contrast two animals.

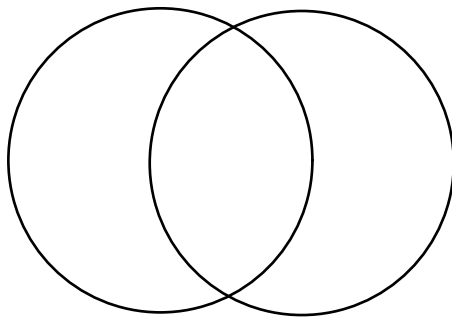

Literal

List information that is visible about each animal.

Animal 1	Animal 2
<ul style="list-style-type: none">•••••	<ul style="list-style-type: none">•••••

Analytic

Compare and contrast the information.

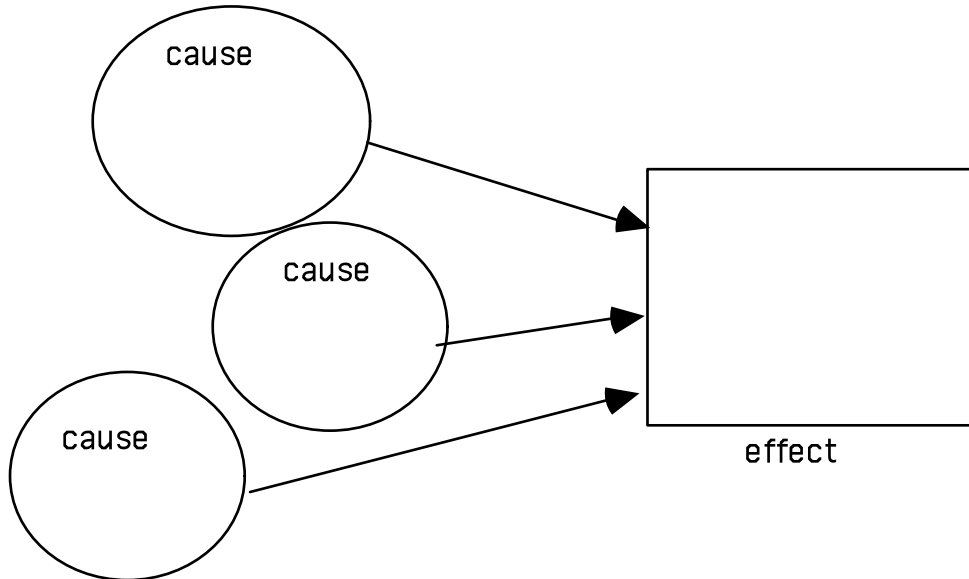

- In what ways are they different?
- In what ways are they alike?

Inferential

What insights do you have based on that information.

For example, what causes led to differences between the two.

**Evaluative**

Which adaptation is most important?
