

Culture Song Writer

CCSSR3. Write **narratives** to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences.

What value or idea that is important to the culture do you want to communicate in your song?

Choose an event from the culture that represents that idea or value. Then plan a song you will write to communicate it.

What image will you include in your song to make that idea or value clear? (To help figure that out, think about what you want people to “see” in their minds as they hear the song.)

What style of music will you use for your song?

How will you use tempo to make points in your song clear?

What else will you do to make your song communicate clearly?

Now you're ready to write!
