
Show Your Thinking

I can infer predictions. (1B)

Students can put evidence in a chart that shows the basis for a prediction.

Choose a story you read.

Choose one character.

Tell about that character.

Tell what the character wants.

Then predict what you think will happen next—after the story ends, what might happen?

Who	Wants What	Probably Will Do What

Think about a real situation.

Make the same chart for that situation.

Who	Wants What	Probably Will Do What
