PARCC SAMPLE QUESTION AND TASK MODELS Grade 5
EDITED TO PROVIDE TRANSFERABLE FRAMES WITH INCREASED CHALLENGE

The following “frames” are edited questions from the PARCC samples. The editing has involved removing the specific identification of the texts and components so that teachers can construct parallel sequences and kinds of questions for other texts.

KINDS OF QUESTIONS AND TASKS

Evidence-Based Selected Response (EBSR)
Questions identified as EBSR are EVIDENCE BASED SELECTED RESPONSE ITEMS--items that include multiple choice options in the following sequence:

First question requires students to select one of at least four responses based on information in the text.
Next question requires students to choose evidence from the text to support the selected answer to the first question.

These “frames” do not include the responses for the EBSR questions so that they can be transferred to other texts. To transfer them to other texts, students should either select the best response from the text or teachers should set up possible responses. To increase the level of challenge, students should select the best answers based on the text independent of multiple choice options—these resources are not intended to replicate PARCC as test prep exercises but instead to demonstrate the kinds of thinking that students need to be able to transfer across texts.

Technology Enhanced Constructed Response (TECR)
Tasks that require students to use a cursor to move items from a text or about a text into a graphic organizer are Technology Enhanced Constructed Responses. On PARCC, these tasks include lists or otherwise identified items that the student moves to construct a response. To increase the level of challenge, students should identify examples from the text to insert in the graphic organizers.

Prose Constructed Response (PCR)
Task that require students to write in response to a text may include analysis of texts, narratives based on texts, or “research simulation” in which students report on and analyze a topic presented in different passages and often a video. While some of these items require students to analyze the strength of support for a claim in a text, the students do not write the traditional “persuasive” essay—they evaluate the texts they read.
