

## Word Bank: Cell Biology

Here are some of the terms students need to know about cells and how they work.  
 Choose the words that your class will learn.  
 Add more words, too.

Basics	Energy	Functions	Information	Career Connection
cell	ATP (adenosine tri-phosphate)	cell division	chromosome	physician
cell membrane	active transport	mitosis	mutation	cell biologist
cell wall	mitochondria	meiosis	recessive gene	virologist
cytoplasm	respiration	osmosis	recombinant DNA	genetic engineer
nucleus		passive transport	ribonucleic acid	
		ribosomes	sex chromosomes	
		synthesis	sex-linked gene	
		enzyme		

To "bank" a word, students should demonstrate that they really know what it means.

These demonstrations can include:

- writing a definition
- finding the word used in a book
- giving a specific example
- drawing a picture that shows what the word means
