

Moving on Air, Land, Water

Your team is going to figure out how different kinds of birds, mammals, or reptiles move in different places.

First. What is your team reporting on? Birds Mammals Reptiles

Second. List four animals in this classification that are very different:

1. A very big animal: _____
2. A very small animal: _____
3. An animal with large feet: _____
4. An animal with small feet or no feet: _____

Third. Tell how each of these animals moves in different places. Does it move in each place, what structures (parts) help it move there, and does it move quickly or slowly there?
